Projects

Create Contact App

The "Create Contact App" project is a website aimed at managing contacts efficiently. Developed using modern technologies like React JS and Redux, it enables users to create contact, can add favorite, edit, delete contacts, signup, login & logout incorporating features like search and categorization. This project showcases proficiency in development and user interface design.

Movie Website

You can explore movie on my website, where you can search any movie you want, can find detailed information, trailers, popular picks, trends, IMDB ratings, and categorization by genre. Dive into a vast collection of films to discover your next favorite.

E-commerce Website

Developed an e-commerce website project leveraging HTML, CSS, and JavaScript, React JS ensuring user-friendly interface and seamless functionality. Implemented responsive design principles for optimal performance across devices. Showcasing strong web development skills and attention to user experience.

Admin Dashboard

Designed and developed an Admin Dashboard website project, offering intuitive user interface for efficient management of website content, user accounts, and data visualization. Implemented features for streamlined administration, enhancing user experience and facilitating seamless navigation.

Work Experience

- Joined workshops at MMSIT, learning by doing projects with others..
- Worked well in teams, solving problems together.
- Made my own project on GitHub, showing what I can do..
- Good at programming and using software needed for projects.
- Also did fun stuff outside class to learn more.

PERSONALITY

- Eager to learn new technologies and improve skills.
- Willingness to work closely with team members, seek feedback, and contribute to collective goals.
- Capable of breaking down complex problems into manageable tasks and finding effective solutions.
- Pay close attention to the details in both code and project requirements to ensure accuracy and quality.
- Commitment to ethical coding practices, including respect for user privacy, security, and intellectual property rights.

Technical skills

Programming Languages

- Proficient in JavaScript (including ES6+), with experience in front-end.
- Familiarity with PHP & Laravel for back-end development and scripting tasks.

Web Development Frameworks

- Hands-on experience with React.js for building dynamic and interactive user interfaces.
- Basic understanding of Node.js for server-side development.

Database Technologies

- Familiarity with relational databases such as MySQL and PostgreSQL, including schema design and querying.
- Exposure to NoSQL databases like MongoDB for flexible data storage needs.

Version Control

- Proficient in Git for version control, including branching, merging, and collaboration workflows.

Web Technologies

- Solid understanding of HTML5 and CSS3, including responsive design principles and CSS preprocessors like Sass.
- Familiarity with RESTful API development and consumption.

Tools and Environments

- EXPERIENCE WORKING WITH DEVELOPMENT TOOLS SUCH AS VISUAL STUDIO CODE, NPM,
- Basic knowledge of command-line interfaces and Unix-based operating systems.

Testing and Debugging

- Ability to debug and troubleshoot issues across the full stack.
